

## Round chisel

Sharpening chisel

**Bricklayer chisel in chromium vanadium steel** with **round section** subjected to special heat treatment which reduces any risk of chipping or structural deformation of the cutting edges. The bulge on the door promotes percussion avoiding possible chipping.

The round chisel **can be sharpened again by grinding**, without requiring a new heat treatment, and guarantees a long life thanks to the special ribs that guarantee greater structural strength.

### TECHNICAL SPECIFICATIONS

- Round section subjected to special heat treatment
- Sharpening with grinding
- Bulging on the door to facilitate percussion
- special ribs that increase structural strength
- Epoxy powder coating

### MATERIALS

- Structure: vanadium chrome steel

### Materials

CV Steel

### Performance

TtT

Regrindable
