

Mason's awl

Chrome steel awl

A **mason's awl** made of chrome vanadium steel with a **round cross-section** subjected to a special heat treatment that reduces any risk of chipping or structural deformation of the cutting edges.

The steel awl is equipped with a **special swelling on the wing** that aids percussion and prevents chipping, while the sharp cutting edge guarantees high strength.

TECHNICAL SPECIFICATIONS

- round section subjected to special heat treatment
- sharpened cutting edge
- swelling on the striking edge to aid percussion
- painted with epoxy powder

MATERIAL

- Frame: chrome vanadium steel

Materials

Carbon Steel
